EDUCATION

•National Institute of Technology Kurukshetra	Current GPA: 7.6/10
B.Tech in Computer Science	2022 – 2026
•RPS Public School, Dharuhera	Percentage: 96%
XII (CBSE)	2021
•RPS Public School, Dharuhera	Percentage: 95.4%
X (CBSE)	2019

TECHNICAL SKILLS AND INTERESTS

Languages : C/C++, Python, Java, JavaScript, TypeScript, HTML, CSS
Machine Learning: Linear Regression, Logistic Regression, Decision Trees, SVM, K-Means
Tools : Git/GitHub, VS Code, IntelliJ IDEA
Frameworks : Node.js, Express.js, TensorFlow, Keras, PyTorch, PySpark, Scikit-learn
Libraries : Pandas, NumPy, Matplotlib, TensorFlow
Databases : MongoDB, MySQL
CS Fundamentals : Data Structures, Operating System, Computer Networks, DBMS, OOPs

PERSONAL PROJECTS

•Stock Market Analysis & Prediction	2025
Developed a data-driven platform for financial trend analysis and stock price forecasting using ML and quantitative modeling.	
– Tools & technologies used: Python, NumPy, Pandas, Matplotlib, Seaborn, SciPy, Jupyter Notebook.	
– Performed in-depth EDA on historical market data to identify volatility clusters and correlations between financial indicators.	
– Implemented Monte Carlo simulations to generate probabilistic price trajectories and estimate Value at Risk (VaR) under varying confidence levels.	
– Compared regression, ARIMA, and LSTM models for price prediction, visualized outcomes, and documented results in reproducible notebooks.	
•Image Caption Generator	2025
Created a deep learning system capable of generating natural language captions for images using encoder–decoder architecture.	
– Tools & technologies used: Python, TensorFlow, Keras, CNN, LSTM, Flickr8k dataset, Google Colab.	
– Preprocessed 40k+ captions with text cleaning, tokenization, and vocabulary filtering; extracted image embeddings using InceptionV3 CNN.	
– Trained an encoder–decoder model (CNN + LSTM) with attention mechanism for sequence generation, achieving BLEU-1: 0.62 and BLEU-4: 0.31 .	
– Evaluated model performance on unseen data and visualized predicted captions for qualitative assessment.	
•Food Dropper	2024
Engineered the backend infrastructure for a scalable food-ordering and delivery platform.	
– Developed RESTful APIs using Node.js and Express.js to manage user authentication, restaurant listings, cart, and order workflows.	
– Integrated MongoDB for structured storage and optimized CRUD operations using Mongoose ODM.	
– Implemented middleware for validation, error handling, and JWT-based authentication to enhance data security.	
– Ensured scalability and performance with asynchronous architecture, caching strategies, and efficient database indexing.	

POSITIONS OF RESPONSIBILITY

•Innovation Cell Society	Engaged in finance and stock analysis within an innovation-driven community.
Finance and Organizational Roles	Feb. 2023 – Present
•Photography Club	Guided junior students in photography basics and practical techniques.
Workshop Instructor	2022 – Jan. 2025
•Technobyte Society	Coordinated end-to-end marketing strategies for campus events, ensuring strong branding.
Outreach Team Member	2022 – Mar. 2024

ACHIEVEMENTS AND CERTIFICATIONS

- Collectively Solved 500+ questions across Data Structure and Algorithms (On Leetcode , GFG and Coding Ninza)
- Cleared Jee Advanced and scored 98.84 percentile in Jee Mains 2022 ranking among the top 1.16% of over 1 million candidates.
- Ranked among the top 5 teams in a college-level hackathon(Xcalibre) demonstrating innovative problem-solving and analytical skills.
- Achieved 4th rank among college participants in a stock market prediction event by leveraging trend analysis and portfolio simulation techniques.
