EDUCATION

National Institute of Technology, Kurukshetra

Nov 2022 – Present

B.Tech in Computer Science

CGPA: 8.67

Vivekananda Vision Public School

March 2020

Intermediate (12th Grade)

77%

EXPERIENCE

CalInfo Pvt. Ltd. | Backend Developer Intern (Onsite)

May 2024 – July 2024

- Developed an AI-powered chatbot using TensorFlow, Flask, and React to automate 100+ daily customer queries. Utilized artificial neural networks (ANN) and natural language processing (NLP) to handle real estate business questions effectively.

TECHNICAL SKILLS

Programming Languages: C/C++, Python, Java, HTML, CSS, JavaScript, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Flask, MongoDB, PostgreSQL, Firebase, Tailwind CSS

Data Science & AI: TensorFlow, PyTorch, Pandas, NumPy, Computer Vision, OCR, NLP

Development Tools: VS Code, Jupyter Notebook, Google Colab, Postman, Kaggle, Git, GitHub

Core Concepts: Data Structures, OOPs, Operating Systems, DBMS, Computer Networks, Distributed Computing, Software Project Management, Agile Methodology, Data Mining, Big Data Analytics, Machine Learning, Deep Learning,

PROJECTS

SpaceXec | NFT-Tokens, Blockchain-like, Smart Contracts, Mongoose, Firebase, Nginx, VPS Hosting

[GitHub](#) [Website](#)

- Developed a robust real estate platform that features **fragmented ownership**, allowing users to invest in over 200 properties using more than 5000 NFT-style tokens and cryptographic SHA hashes.
- Implemented role-specific dashboards for over four distinct user categories (Admin, Vendor, Channel Partner, Customer), incorporating live graphs, diverse login methods including manual entry and Google sign-in, as well as transaction analytics for more than 10,000 simulated entries.
- Designed a robust system architecture prioritizing high availability, achieving a simulated 99.9% uptime by leveraging Nginx on a VPS. Managed over 1,200 API requests daily and handled over 50 GB of media through Firebase and Cloudinary, ensuring consistent performance during peak traffic periods.

AeroWebsite | React, 3D Modeling, Firebase, Mongoose, Nginx, VPS, Postman

[GitHub](#) [Website](#)

- Developed a dynamic Aeroclub platform serving 2,000+ users with 250+ daily logins, handling event management, attendance tracking, and member onboarding with high reliability.
- Implemented a secure QR-based attendance system for 400+ members, processing 100+ daily check-ins.
- Built 3D interactive pages using **react-three/drei**, managed 10,000+ records and 2,000+ media files (50+ GB) via Firebase/Mongoose, and ensured 99% uptime with Nginx on VPS.

Chatbot-2.1 | AI/ML, TensorFlow, Flask, Python, Git, VS Code

[GitHub](#)

- Implemented an interactive chatbot for machine learning, handling 100+ unique queries with 90% contextual relevance and 94% accuracy from a dataset of 30,000 conversation lines.
- Employed NLTK and TensorFlow for NLP tasks, analyzing 1,000+ sentences to enhance responses related to machine learning by 25% for 12 conversation categories.
- Simulated deployment with Flask, testing performance by managing up to 50 queries per minute.

ACHIEVEMENTS

- 3 @CodeChef (1600+ rating) through active participation in contests.
- Solved 600+ problems on LeetCode, CodeStudio, and GFG, strengthening DSA skills.
- Smart India Hackathon finalist: developed drone-tech solution for medical surveillance.
- Researched Aero-modelling projects, building VTOLs, self-centering drones, and autonomous planes.

POSITION OF RESPONSIBILITY

AeroModelling Club

Secretary of the Club

NCC Cadet

Serving as NCC-cadet

Technobyte

Member of Technobyte

Basketball Team Member

Played in college matches
